

REMARKS

Applicant appreciates the Examiner's thorough consideration provided the present application. Claims 1-20 are now present in the application. Claims 5, 19 and 20 have been amended. Claims 1, 3 and 5 are independent. Reconsideration of this application, as amended, is respectfully requested.

Allowable Subject Matter

The Examiner has indicated that claims 1-18 are allowed. Applicant greatly appreciates the indication of allowable subject matter by the Examiner. As the Examiner will note, in light of the foregoing amendments, it is believed that all pending claims are allowable.

Claim Rejections Under 35 U.S.C. §112

Claims 19 and 20 stand rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the written description requirement. This rejection is respectfully traversed.

In light of the foregoing amendments to the claims, Applicant respectfully submits that this rejection has been obviated and/or rendered moot. As the Examiner will note, claims 5, 19 and 20 been amended to address the Examiner's rejection.

Independent claim 5 now recites "a grounded wire having a first end and a second end opposite to the first end" and "the first end of the grounded wire is electrically connected to the conductive film on the second surface of the ceramic capacitance board".

Claim 19 now recites “each terminal of the wires of the inductance coil and the second end of the grounded wire not contacted to the conductive film of the second surface are facing toward a direction that is parallel to the ceramic capacitance board”.

Claim 20 now recites “each terminal of the wires of the inductance coil and the second end of the grounded wire not contacted to the conductive film of the second surface are facing toward a direction that is perpendicular to the ceramic capacitance board”.

As shown in FIG. 4A and 5A, the grounded wire 55 has a first end (right end) which is electrically connected to the conductive film (22c in FIG. 3B) on the surface of the ceramic capacitance board 2, and a second, opposite end (left end) which is remote from the conductive film on the surface of the ceramic capacitance board 2. Each terminal of the wires 51-54 of the inductance coil 5 and the second end of the grounded wire 55 face toward a direction that is parallel to the ceramic capacitance board, *i.e.*, the horizontal direction (see FIGs. 4A and 5A). Since the embodiments as shown in FIGs. 4A and 5A fully support the subject matter of claim 19, it is believed that claim 19 complies with the written description requirement.

Similarly, as shown in FIG. 4B and 5B, the grounded wire 55 has a first end (lower end) which is electrically connected to the conductive film on the surface of the ceramic capacitance board 2, and a second, opposite end (upper end) which is remote from the conductive film on the surface of the ceramic capacitance board 2. Each terminal of the wires 51-54 of the inductance coil 5 and the second end of grounded wire 55 face toward a direction that is perpendicular to the ceramic capacitance board, *i.e.*, the vertical direction (see FIGs. 4B and 5B). Since the embodiments as shown in FIGs. 4B

and 5B fully support the subject matter of claim 20, it is believed that claim 20 complies with the written description requirement.

Accordingly, reconsideration and withdrawal of the rejection under 35 U.S.C. § 112, first paragraph, are therefore respectfully requested.

CONCLUSION

It is believed that a full and complete response has been made to the Office Action, and that as such, the Examiner is respectfully requested to send the application to Issue.

In the event there are any matters remaining in this application, the Examiner is invited to contact Joe McKinney Muncy, Registration No. 32,334 at (703) 205-8000 in the Washington, D.C. area.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37 C.F.R. §§1.16 or 1.17; particularly, extension of time fees.

Dated: September 7, 2005

Respectfully submitted,

By:
